COMMODITY TRADE BY INDUSTRIAL SECTOR WITH JAPAN

Historical Summary 1966-1983

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1983. The summary also includes separate (combined re-exports and imports) as a primary value basis.

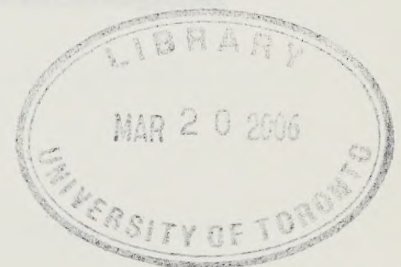

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this volume, these statistics have been reclassified according to the main sector of origin of the goods, i.e., exports to the United States, Japan, and the rest of the world. These reclassifications in Canada, and the changes to these figures are in Canada which will be used in the analysis of the trade in goods with Japan.

HISTORICAL SUMMARY

1966 - 1983

This report, prepared for Statistics Canada, provides a summary of the merchandise trade in goods with Japan by industrial sector for the years 1966-1983. The report is based on the data from the International Trade in Goods and Services (ITGS) database, which is a comprehensive source of information on the trade in goods and services between Canada and other countries. The report is organized into three main sections: a summary of the trade in goods with Japan, a detailed analysis of the trade in goods with Japan by industrial sector, and a summary of the trade in goods with Japan by country of origin. The report is intended to provide a comprehensive overview of the trade in goods with Japan and to provide a basis for further analysis and research.

COMMODITY TRADE BY INDUSTRIAL SECTOR WITH JAPAN

Historical Summary 1966-1983

Attached is a review of Canada's external merchandise trade classified by the principal industrial sectors for the years 1966-1983. The tabulations show total exports (including re-exports) and total imports on a customs value basis.

Canada's merchandise trade statistics are officially recorded and tabulated by Statistics Canada following a system of commodity classification. In this report, these commodity data have been allocated to the most nearly appropriate industry groups, i.e., exports to the industries which have produced or manufactured these commodities in Canada, and the imports to those industries in Canada which could or would produce or manufacture these commodities in Canada.

The revised 1970 Standard Industrial Classification issued by Statistics Canada in December 1970 is the framework used. Particular commodity groups within industries are also shown at various points in the tabulation.

It should be emphasized that although re-exports are included in the data for total exports on a customs value basis, these data should not be used to calculate the balance of trade. The latter is only strictly appropriate on a balance of payments basis.

This report, produced from Statistics Canada latest records, supercedes the previous "Commodity Trade by Industrial Sector, Historical Summary, 1966-1982" issued by the Statistical and Data Base Services Directorate, of the then Regional and Industrial Policy and Small Business, Department of Industry, Trade and Commerce/Regional Economic Expansion in August, 1983.
